6. Reading

Many people believe that success depends mainly on talent. However, if success depended only on talent, many highly talented people would achieve their goals without making much effort. In reality, discipline and persistence are often just as important.

If some successful people had given up when they experienced their first failures, they might never have achieved anything significant. Some of them say that if they had known how difficult the process would be, they might not have started at all.

Today, however, they often look at those difficulties differently. One entrepreneur explains that if he had been more organised in the past, he would have avoided several serious mistakes. He also says that if he were still as impatient as he was ten years ago, he wouldn't be running his company successfully today.

His advice is simple: take opportunities as long as they are realistic, prepare carefully in case problems occur, and don't give up even if the first attempt fails.
