

B2

COMPLEX DECISIONS, ETHICAL DILEMMAS AND ARGUMENTATION

Na poziomie B2 analizujemy:

- złożone problemy,
- proces podejmowania decyzji,
- konflikty wartości,
- dylematy etyczne,
- odpowiedzialność jednostki,
- odpowiedzialność instytucji,
- ryzyko,
- konsekwencje społeczne,
- argumenty za i przeciw,
- kompromis,
- krytyczne myślenie.

ADVANCED VOCABULARY

dilemma — dylemat

trade-off — konieczność wyboru między konkurującymi korzyściami

ethical issue — kwestia etyczna

moral responsibility — odpowiedzialność moralna

accountability — odpowiedzialność / rozliczalność

consequence — konsekwencja

implication — następstwo / implikacja

stakeholder — interesariusz

conflict of interest — konflikt interesów

risk assessment — ocena ryzyka

decision-making process — proces podejmowania decyzji

long-term impact — długoterminowy wpływ

short-term benefit — krótkoterminowa korzyść

unintended consequence — niezamierzona konsekwencja

compromise — kompromis

ETHICAL THINKING

A decision can be legal but still be considered unethical.

A decision can also have positive short-term effects but negative long-term consequences.

When analysing an ethical problem, we should consider:

- who is affected,
- what the possible consequences are,
- whose rights are involved,
- who is responsible,
- whether the decision is fair,

- whether there are alternative solutions.

ARGUMENTATION

It could be argued that...

One possible objection is that...

The strongest argument in favour is...

The main criticism of this approach is...

This raises the question of whether...

The situation is more complicated than it may initially appear.

A possible compromise would be...

The long-term consequences should also be considered.

From an ethical perspective...

From a practical perspective...

KARTA PRACY B2

Ćwiczenie 1 — Vocabulary

Wyjaśnij:

1. dilemma
2. trade-off
3. accountability
4. stakeholder
5. conflict of interest
6. risk assessment
7. unintended consequence
8. compromise

Ćwiczenie 2 — Ethical dilemma

A company discovers that one of its products may be unsafe.

The company can:

- A. stop selling the product immediately,
- B. continue selling it while investigating,
- C. warn customers but continue production.

Przeanalizuj:

- financial consequences,
- customer safety,
- reputation,
- legal responsibility,
- employee interests,
- long-term consequences.

Ćwiczenie 3 — Technology and ethics

Czy firma powinna używać AI do automatycznego oceniania kandydatów do pracy?

Przedstaw:

Arguments for

1.

Arguments against

1.

Następnie przedstaw własne stanowisko.

Ćwiczenie 4 — Risk assessment

Rozważ decyzję:

A school wants to introduce facial recognition cameras.

Oceń:

- security,
- privacy,
- cost,
- effectiveness,
- possible abuse,
- students' rights.

Ćwiczenie 5 — Debate

Przedyskutuj:

Should companies ever prioritise profit over social responsibility?

Użyj co najmniej pięciu konstrukcji argumentacyjnych z sekcji **Argumentation**.

READING B2

The difficult decision

A large company discovered that one of its automated systems was making decisions that could disadvantage certain groups of customers.

The system had been introduced to make the process faster and reduce costs. However, an internal investigation suggested that some customers were being treated unfairly.

The company now faced a dilemma. Suspending the system would be expensive and would slow down the service. Continuing to use it could damage the company's reputation and create ethical and legal problems.

Some managers argued that the system should remain in operation until a better alternative was available. Others believed that the company had a responsibility to stop using it immediately.

The final decision was to suspend the system temporarily, investigate the problem and introduce additional human oversight.

The decision was costly in the short term, but the company argued that protecting customers' rights and maintaining public trust were more important than immediate financial savings.

Questions

1. Why had the system been introduced?
 2. What problem was discovered?
 3. What dilemma did the company face?
 4. Why did some managers want to continue using the system?
 5. Why did others want to stop it?
 6. What decision was finally made?
 7. What values influenced the decision?
 8. What were the possible long-term benefits?
-

LISTENING B2

Posłuchaj nagrania.

Good decision-making is not simply about choosing the option that produces the greatest immediate benefit. In many situations, decision-makers have to consider risks and consequences that may appear much later. They also need to think about people who are not directly involved in the decision but may still be affected by it. This is particularly important when decisions involve technology, personal data or public safety.

Questions

1. Is good decision-making only about immediate benefits?
 2. What else should decision-makers consider?
 3. Why are indirect effects important?
 4. Name three areas mentioned in the recording.
 5. What is the main message?
-

SPEAKING B2

DEBATE

SHOULD ETHICAL CONSIDERATIONS EVER BE MORE IMPORTANT THAN PROFIT?

Omów:

- profit,
- responsibility,
- customers,
- employees,
- reputation,
- law,
- long-term consequences,
- social responsibility.

Przedstaw:

- argumenty za,
 - argumenty przeciw,
 - możliwy kompromis,
 - własny wniosek.
-

WRITING B2

Napisz **180–220 słów**:

AN ETHICAL DILEMMA

Opisz złożony problem etyczny, przedstaw różne stanowiska, możliwe konsekwencje i własne rozwiązanie.

TEST B2

1. "dilemma" means:

- A. dylemat
- B. kompromis
- C. rozwiązanie

2. "accountability" means:

- A. odpowiedzialność / rozliczalność
- B. ryzyko
- C. korzyść

3. "trade-off" means:

- A. konieczność wyboru między konkurującymi korzyściami
- B. proste rozwiązanie
- C. konflikt pracowników

4. Wyjaśnij, czym jest konflikt interesów.

5. Dlaczego legalne działanie nie zawsze musi być etyczne?

6. Wymień pięć czynników, które należy uwzględnić przy podejmowaniu trudnej decyzji.

7. Przedstaw argumenty za i przeciw wykorzystywaniu AI do podejmowania decyzji dotyczących ludzi.

8. Zaproponuj kompromis w wybranym dylemacie etycznym.
