READING A2

City or countryside?

Anna lives in the city centre. She likes her flat because everything is close. There are shops, restaurants, a cinema and a bus stop near her building. She doesn't need a car.

However, the city centre can be noisy, especially at weekends. The flat is also quite small and there is no garden.

Her brother lives in the countryside. His house is much bigger and he has a large garden. The area is peaceful and there is very little traffic. On the other hand, there are not many shops nearby and public transport is limited.

Both places have advantages and disadvantages.

Questions

1. Why does Anna like her flat?
 2. What are the disadvantages?
 3. Where does her brother live?
 4. What is his house like?
 5. What is difficult about living there?
 6. Which place would you prefer?
-

LISTENING A2

Posłuchaj nagrania.

We moved to a new flat last year. It is smaller than our old house, but it is much closer to my school. There is a supermarket downstairs and a bus stop just outside the building. The flat doesn't have a garden, which I miss, but we have a large balcony. I think the new location is much more convenient.

Questions

1. When did they move?
 2. Is the new flat bigger or smaller?
 3. Why is the location better?
 4. What is downstairs?
 5. What is outside the building?
 6. What does the speaker miss?
-
