

C1

LEISURE, IDENTITY AND THE PSYCHOLOGY OF ATTENTION

Na poziomie C1 potrafimy analizować:

- wpływ kultury i technologii na nasze wybory,
 - mechanizmy ekonomii uwagi,
 - uzależnienie od cyfrowej rozrywki,
 - rolę hobby w budowaniu tożsamości,
 - granicę między odpoczynkiem a produktywnością,
 - społeczne konsekwencje zmiany sposobu spędzania czasu.
-

Advanced vocabulary

attention economy — ekonomia uwagi

digital dependency — zależność cyfrowa

compulsive behaviour — zachowanie kompulsywne

instant gratification — natychmiastowa gratyfikacja

self-regulation — samoregulacja

delayed gratification — odroczone gratyfikacja

leisure culture — kultura czasu wolnego

sense of identity — poczucie tożsamości

social pressure — presja społeczna

passive consumption — bierna konsumpcja

meaningful leisure — wartościowe spędzanie czasu

intentional use — świadome korzystanie

Leisure and identity

Hobbies are not simply ways of filling empty time.

They can influence:

- our identity,
- social relationships,
- confidence,
- skills,
- values,
- sense of belonging.

A person who regularly plays music, volunteers or participates in sport may begin to see these activities as an important part of who they are.

The problem of constant stimulation

Modern entertainment provides almost unlimited stimulation.

We can immediately access:

- videos,
- music,
- games,
- news,
- social media,
- conversations.

As a result, activities that require patience and concentration may become more difficult.

The ability to tolerate boredom can therefore become an important skill.

KARTA PRACY C1

Ćwiczenie 1 — Vocabulary

Wyjaśnij po angielsku:

1. instant gratification
 2. delayed gratification
 3. self-regulation
 4. passive consumption
 5. meaningful leisure
 6. digital dependency
-

Ćwiczenie 2 — Cause and effect

Wyjaśnij zależność:

constant stimulation → **shorter attention span** → **preference for instant entertainment** →

Ćwiczenie 3 — Critical thinking

Czy czas wolny musi być produktywny?

Przedstaw:

- argument za,
 - argument przeciw,
 - kontrargument,
 - własny wniosek.
-

Ćwiczenie 4 — Identity

Dokończ:

A hobby can become part of a person's identity when...

People may continue an activity even when it is difficult because...

Social pressure can influence leisure choices by...

READING C1

The changing meaning of free time

For much of human history, leisure was understood primarily as time away from work. Today, however, the distinction between work and leisure has become increasingly blurred.

Digital technology allows people to work from almost anywhere, but it also means that entertainment and communication are constantly available. A smartphone can be used for work, education, social interaction and relaxation within the space of a few minutes.

This flexibility can be liberating, but it also places greater responsibility on individuals to regulate their own behaviour. When entertainment platforms are designed to maximise engagement, choosing to stop using them may require conscious effort.

At the same time, leisure should not necessarily be judged according to its productivity. Reading a novel, talking to a friend or simply doing nothing may have value precisely because these activities are not designed to produce an immediate result.

The challenge of modern leisure may therefore be less about finding more free time and more about deciding what we want that time to mean.

Questions

1. How has the meaning of leisure changed?
 2. Why has the distinction between work and leisure become blurred?
 3. What responsibility does digital technology place on individuals?
 4. Why can stopping entertainment require conscious effort?
 5. Does every leisure activity need to be productive?
 6. What is the main argument of the final paragraph?
-

LISTENING C1

Posłuchaj nagrania.

We tend to think of free time as something that should either relax us or make us more productive. This way of thinking may itself create unnecessary pressure. If every hour outside work has to be used for exercise, learning or self-improvement, leisure can become another form of work. Meaningful free time may sometimes involve activities that have no measurable benefit at all. Their value lies in the experience itself, rather than in what they produce.

Questions

1. What two purposes do people commonly associate with free time?
 2. Why can this create pressure?
 3. What happens when leisure becomes another form of work?
 4. What can meaningful free time involve?
 5. Where can the value of an activity lie?
-

SPEAKING C1

DISCUSSION

DOES FREE TIME NEED TO BE PRODUCTIVE?

Omów:

- produktywność,
- odpoczynek,
- hobby,
- presję społeczną,
- media cyfrowe,
- samoregulację,
- znaczenie nudy.

Użyj konstrukcji:

- It could be argued that...
 - There is a tendency to assume that...
 - This raises the question of whether...
 - A distinction needs to be made between...
 - The issue is more complex than it may initially appear.
 - Ultimately, the value of leisure depends on...
-

WRITING C1

Napisz 250–300 słów:

DOES MODERN TECHNOLOGY GIVE US MORE FREE TIME OR SIMPLY CHANGE HOW WE USE IT?

Przedstaw problem z różnych perspektyw i sformułuj własny, uzasadniony wniosek.

TEST C1

1. "instant gratification" means:

- A. natychmiastowe zaspokojenie potrzeby
- B. długotrwały wysiłek
- C. planowanie przyszłości

2. "self-regulation" means:

- A. samoregulacja i kontrolowanie własnego zachowania
- B. regulowanie innych osób
- C. korzystanie z mediów społecznościowych

3. "passive consumption" means:

- A. bierne konsumowanie treści
- B. aktywne tworzenie treści
- C. aktywność fizyczną

4. Why can digital entertainment make self-control more difficult?

- A. It is often designed to maintain users' attention.
- B. It is only available at certain times.
- C. It requires physical activity.

5. Wyjaśnij, dlaczego hobby może stać się częścią tożsamości człowieka.

6. Wyjaśnij różnicę między instant gratification i delayed gratification.

7. Czy nuda może mieć pozytywną funkcję? Uzasadnij.

8. Wyjaśnij, dlaczego nie każdy czas wolny musi być produktywny.

9. Przedstaw jeden argument za ograniczeniem korzystania z mediów społecznościowych.

10. Przedstaw kontrargument.
